

## **QuadAir**

**QUADAIR is the new centerpiece and novelty item for any FEC location. Features include an aluminum body, polycarbonate surface, scoring and timer on the playfield, and blue LEDs around puck release. Play with 2, 3, or 4 people and up to 4 pucks at a time. Each player's goal gate will drop when they insert money, so that players cannot score on empty goals. Anyone can join in at anytime!**

It's not just a new table but a new and different way to play the game. The major point of this game is that it's not played offensively. It is a defensive game. The main objective is to protect your goal. In traditional air hockey, you are shooting to score on the other player. In QuadAir you are defending your goal from other players scoring on it. This table allows continuous game play. The players have an incentive to put more money into a continuing game, rather than walk away at the game's end. It is more cost effective to have one QuadAir, than 2 individual tables side by side

### **How To Play**

-QuadAir is activated by 2 or more players putting in coins or tokens, on their own side. (Card swipe compatible, dollar bill acceptor is an additional fee)

-Once 2 or more players insert money, their goal gate will drop and a puck will be released.

-Each player has 5 lives, which is indicated on the playfield by 5 lights in front of their goal. Each time the player is scored on, 1 light will turn off. After the player has been scored on 5 times a GAME OVER light will flash in front of the goal and the gate will go back up so that no other goals can be scored until more money is inserted into that specific gate.

### **Features**

- For up to 4 Players
- LED scoring, timer and Game Over light on Playfield
- Blue LED's around puck release
- Chasing playfield LED lights
- 8 Mallets and 20 pucks
- 4 Mallet holders on each side on table
